Saguaro Insights Will Show Bear Down Bank Which Cards to Replace Early and What It Costs

Prepared for Renee Castillo, Director of Card Operations

Prepared for Data Visualization, University of Arizona. Course scenario using a provided dataset.

29.2% of cards still lack contactless, and 229 are not scheduled for replacement soon

1,693

non-contactless cards, 29.2% of 5,802

229

expire in 7 to 12 months

Saguaro Insights

We answer one question in three steps: which cards, when, and at what cost

1. Questions

Which non-contactless cards should be replaced early, and what will the batch cost?

2. Data

Your customer and card extracts as of September 30, 2026.

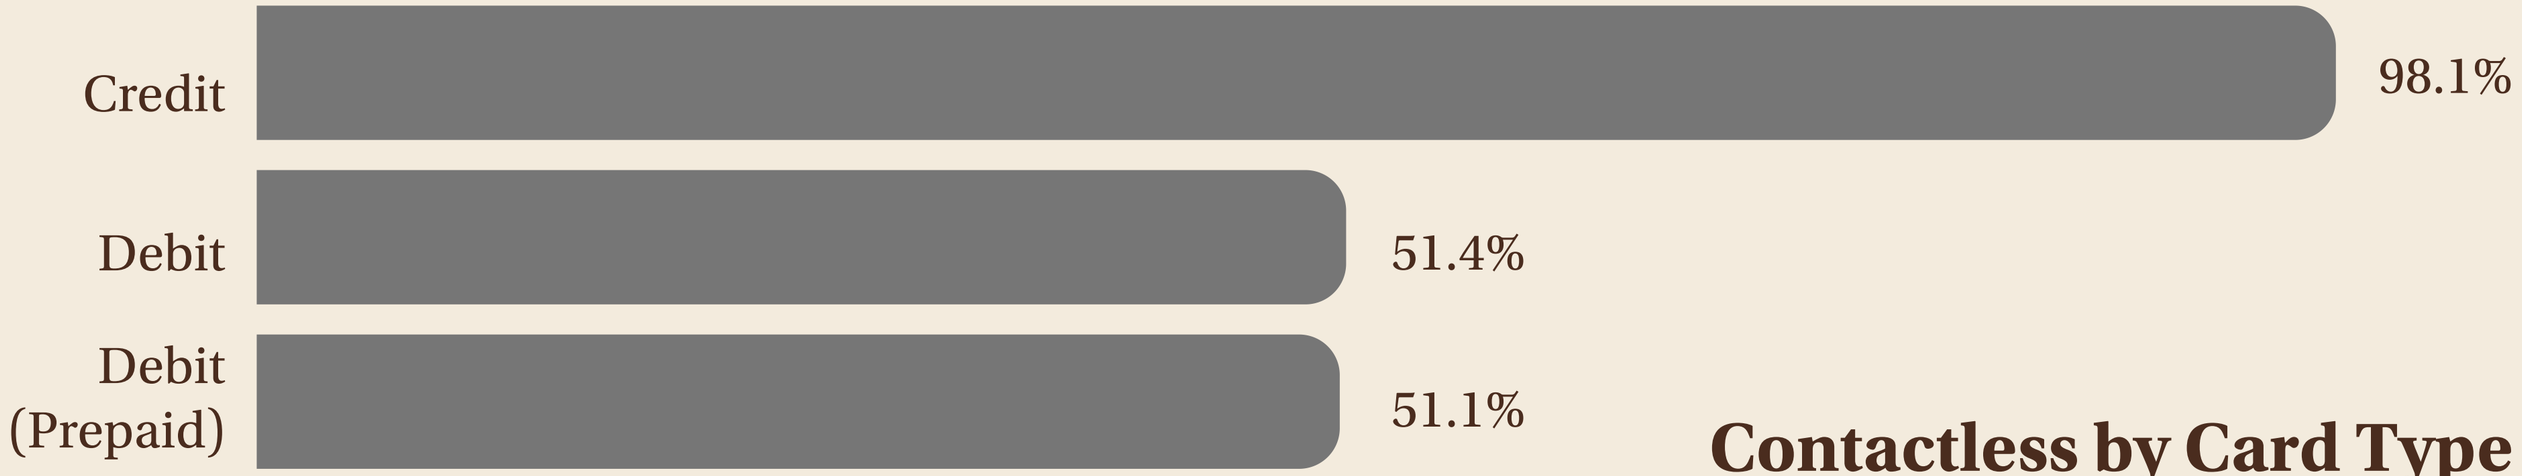

3. What You See

A replacement list and a cost view by expiry window.

Saguaro Insights

Credit portfolio leads adoption at 98.1%, leaving Debit and Prepaid accounts as primary targets.

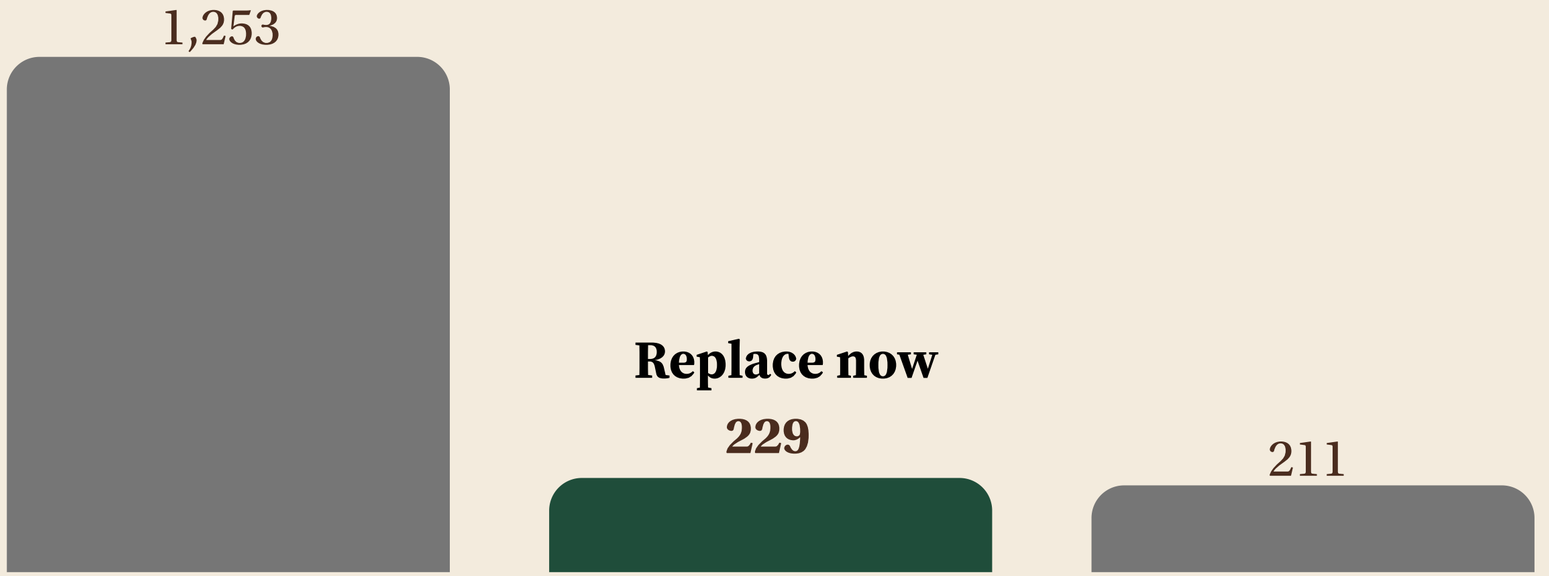

Contactless by Card Type

Saguaro Insights

Note: chart covers the 4,109 contactless cards out of 5,802 total cards as of Sep 30, 2026.

Our work sample already shows 229 cards to replace now for $1,832

229 × $8 = $1,832

Non-contactless cards by time until expiry.
The $8 per card is Bear Down Bank's estimate.

Saguaro Insights

Note: chart covers the 1,693 non-contactless cards out of 5,802 total cards as of Sep 30, 2026.

A six-week first phase prepares next quarter's early-replacement batch

Weeks 1 - 2	*Confirm the extract and the 6-month automatic replacement rule*
Weeks 3 - 4	*Build the replacement list and cost view by expiry window*
Weeks 5 - 6	*Review with Card Operations and hand off the dashboard*

The list changes as cards age, so the first phase prepares the next batch from a current list

Expiry Window	Non-Contactless Cards	Action
Within 6 months	1,253	Replaced automatically
7 to 12 months	229	Replace now
Over 12 months	211	Review later

Approve a six-week first phase to prepare next quarter's early-replacement batch
